DETAILED ACTION

Response to Amendment/Argument

1. Applicant's argument, see page 8 of the response, filed 11/16/2006, with respect to the previous rejection(s) of claim(s) 26, 27 have been fully considered and are persuasive. Therefore, the rejection(s) has been withdrawn.

The previous indicated allowability of claims 1-25 in the instant application have been withdrawn in view of claims 1-25 of copending application 11/560705. A new ground of rejection of claims 1-25 based on statutory double patenting is discussed below

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-25 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-25 of copending Application No. 11/560,705. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 1765

Allowable Subject Matter

3. Claims 26-28, 30 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 26, the cited prior art of record fails to disclose or suggest a method for use in semiconductor fabrication comprises a step of using said determined etch time to produce a multi-layer laminate including at least a first and second layer of wide band gap semiconductor material, in combination with the rest of the steps/limitations of claim 26

Regarding claim 27, the cited prior art of record fails to disclose or suggest a method for use in semiconductor fabrication comprises a step using the first conductance measurement of the layer and the second conductance measurement of the layer to determine the etch time for etching an additional amount of the layer of material, in combination with the rest of the steps/limitations of claim 27

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lan Vinh whose telephone number is 571 272 1471. The examiner can normally be reached on M-F 8:30-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571 272 1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
